

Armillary Sundial Sphere

Beautifully made armillary sundial, with brass hour reader on inside. Available in two sizes.

The armillary sphere should be positioned so that the meridian ring lies in the north-south attitude, with arrow head of gnomon pointing due north. The shadow of the gnomon, cast across the brass scale of the equatorial ring shows the time. Just at noon the shadow of the meridian ring itself will fall across the gnomon and also across the 12 o'clock line.

At the time of the equinox, the sun will be on the celestial equator and hence in the plane of the equatorial ring of the armillary sphere. The shadow of the upper part of the equatorial ring will then fall exactly across the lower part of the ring and the graduations will be shaded. At the times of the equinoxes the shadow of the equatorial band falls at the centre of the gnomon, ie at the centre of the sphere.

12" Armillary Sundial Sphere

Our stock code: GSN013
Price: £235.00 + VAT (EACH)

18" Armillary Sundial Sphere

Our stock code: GSN014
Price: £275.00 + VAT (EACH)
